How to / Maniaplanet / General / File locations

Introduction

Here's a comprehensive list on where to find the different media sources and where to put your own.

First of all : Be clever !

When you install Trackmania 2 or Shootmania, you can chose a custom folder to install the "common" files and another one for the "personal" files. Use this option, it will help you finding your way through the huge amounts of data.

I have installed the **game** to `D:\Games\Maniaplanet` , the **common files** to `D:\Games\ManiaplanetCommon\` and the **personal files** to `D:\Games\ManiaPersonal\`. In case you don't want this, Maniaplanet will install these folders somewhere buried in the subfolders of your C:\ System partition.

> You can change the locations of the personal & common files folder afterwards. Start the launcher, click the "help" button and there you'll find 2 options, "**move game data**" and "**move personal data**".
